The compiler of this book collected many 'bits' of information for his own use over the years and, sometimes as in this case the name of the original source of the information has become lost. However, as some little clue may be just what is needed, I offer these names and hope they will be of help. I suspect that the original book was an Atlas of Chariton County, Mo., before the turn of the century or it may be from one of the county histories at about the same point in time.
